

Drain the fuel from the tank and carburetor if you do not plan to use the engine for 30 days or more. Stale fuel may damage the carburetor causing hard starting problems. *See your Owner's Manual for additional details regarding fuel deterioration and recommendations on how to properly store your engine.

Turn the fuel valve lever to the ON position.

Drain the fuel from the carburetor and fuel tank into an approved container. Please dispose of fuel in a manner that is compatible with the environment.

Loosen the carburetor drain bolt.

Tighten the carburetor drain bolt.
